Career Objective

A results-driven BCA undergraduate passionate about engineering intelligent and scalable software solutions. Proven ability to design high-performance Machine Learning models achieving 90%+ accuracy and deploy them in real-world environments.

Experienced in blending ML intelligence with Full Stack development to build end-to-end applications.

Aspiring to contribute strong technical depth, innovation, and execution skills to impactful technology teams.

Education

Bachelor of Computer Applications (BCA)

KLE Society's BCA College, Haveri

Overall Percentage: 85% (Till Date)

Technical Skills

Programming Languages: Python, JavaScript

Web Technologies: HTML5, CSS3

Machine Learning: Data Preprocessing, Model Training, Model Evaluation, Accuracy Optimization

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Flask

Full Stack Development: Frontend Development, Backend Development, REST APIs, Application Deployment

Databases: MySQL

Tools & Core Skills: Git, GitHub, VS Code, Jupyter Notebook, Problem Solving, Debugging

Projects

IRIS Flower Classification – Machine Learning Project

- Built a supervised ML classification model achieving 92% prediction accuracy.
- Improved model performance by approximately 15% through preprocessing and optimization.
- Evaluated multiple algorithms using accuracy-based metrics.
- Deployed the model using Flask API with real-time prediction support.

Full Stack E-Commerce Web Application

- Developed a complete e-commerce system covering 100% core shopping workflow.
- Improved user interaction by nearly 40% with responsive UI design.
- Implemented backend logic and database connectivity.
- Achieved full functional deployment with integrated frontend and backend.

Training

Machine Learning Training Program

- Completed full ML lifecycle training from preprocessing to deployment.
- Built and deployed models with consistent 90%+ accuracy.
- Gained strong hands-on experience in Python, Scikit-learn, and Flask API deployment.
